

TREATMENT OF RHEUMATOID ARTHRITIS: A CASE OF LIVER DEFICIENCY

***** PLEASE, TO TREAT THIS DISEASE USE “THE IMMUNE SYSTEM TREATMENT PROCESS” INSTEAD OF THIS ONE *****

FOREWORD. *This method has been successfully tested.* Before reading about any of the treatments, you should learn about TENS (Transcutaneous Electrical Nerve Stimulator), which is equivalent to medication, and review its features by reading the corresponding file included in this package. You can purchase it online, but be sure to check that the “Stimulation Modes” include the option: “Normal or Constant.” If this treatment does not result in a cure, you should consult your treating physician.

INTRODUCTION

To date, I have found various causes of the disease online, as well as several cures;

- a. Rheumatoid arthritis (RA) is a chronic autoimmune disease that causes inflammation and pain in the joints, especially in the hands, feet, and wrists. It affects the lining of the joints and can damage bone tissue and cartilage over time. In addition to the joints, the inflammation can spread to other organs and cause symptoms such as fatigue, weight loss, and problems with the skin, eyes, heart, lungs, and nerves.
- b. Urates are salts of uric acid that cause gout. Osteophytes, or calcified salts, are the cause of the remaining 92% of joint and spinal disorders. These include all types of arthritis and osteoarthritis, osteochondrosis, osteoporosis, rheumatism, bursitis, and even hygroma. All of these conditions have a single cause: the deposition of osteophytes.
- c. THYMUS. A possible cause of this disease could be the THYMUS: It may be related to autoimmune diseases such as myasthenia gravis, lupus, or rheumatoid arthritis.
- d. Etc.

Following the simple logic that the formation of a substance or layer between the joints could be caused by an organ that produces a large amount of substances, the liver—with more than 500 functions—is a likely culprit. I designed this simple treatment based on the belief that the worst-case scenario in treating a new disease is that it might not be cured, without causing any side effects.

TREATMENT OF RHEUMATOID ARTHRITIS.

1. THE LIVER AS A LIKELY CAUSE.

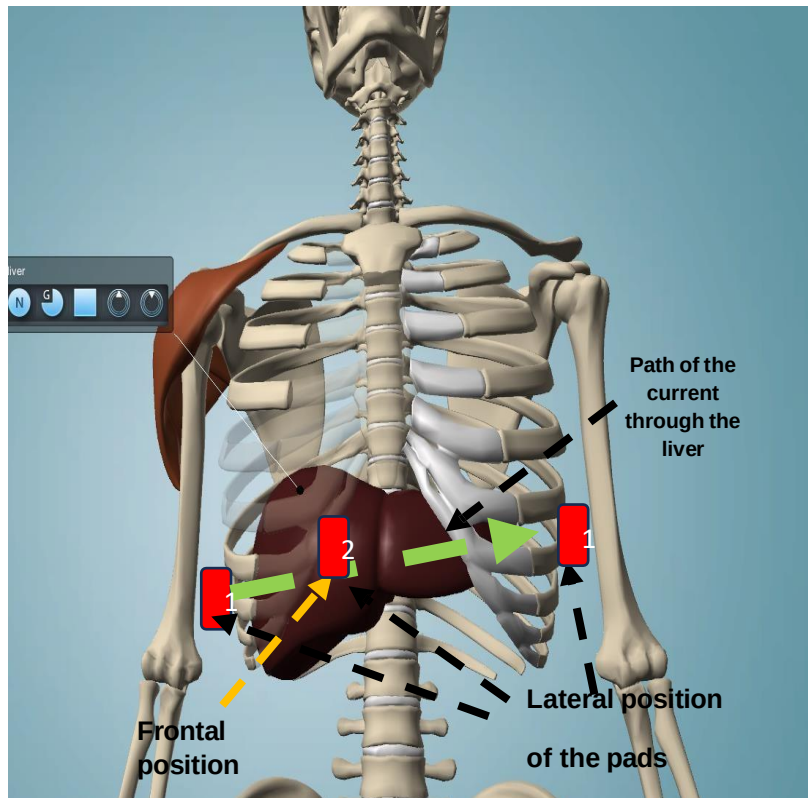

Figure 1. Pad positions for liver treatment.

TREATMENT:

TIME: 10 minutes per position

CURRENT INTENSITY: Increase the current intensity until you feel it, then reduce it slightly until you no longer feel it.

ELECTRICAL STIMULATION

The treatment consists of stimulating the liver (transversely) as shown in Figure 1, applying the durations indicated above.

1. THE THYMUS AS A PROBABLE CAUSE:

“The thymus is an organ of the immune system located in the upper part of the chest, behind the sternum, which produces white blood cells (lymphocytes) to fight infections and which atrophies with age. It also has an endocrine function, as it produces hormones and is associated with various diseases, including tumors and immune system disorders such as myasthenia gravis.”

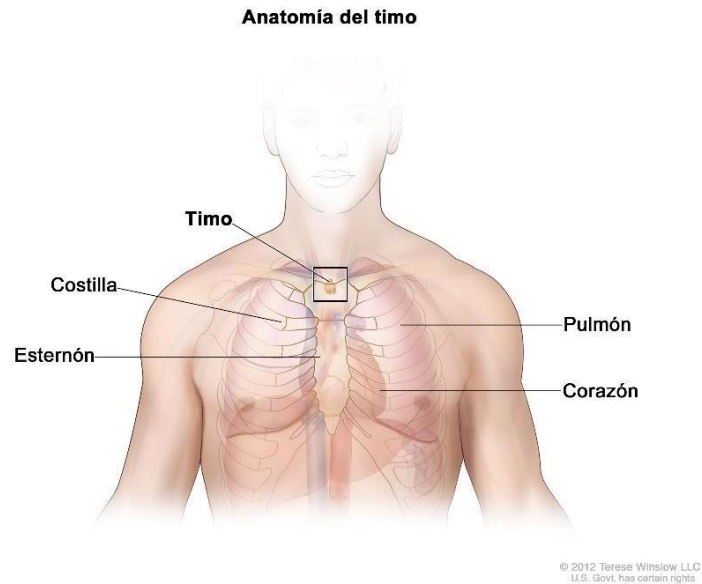

Figure . Location of the THYMUS in the body.

TREATMENT TIME: 10 minutes per position

CURRENT INTENSITY: Increase the current intensity until you feel it, then reduce it slightly until you no longer feel it.
