

TREATMENT OF RHEUMATOID ARTHRITIS: CASE OF LIVER DEFICIENCY

***** PLEASE, TO TREAT THIS DISEASE USE “THE IMMUNE SYSTEM TREATMENT PROCESS” INSTEAD OF THIS ONE**

FOREWORD. *This process has been successfully tested.* Before reading about any of the treatments, you should learn about TENS (Transcutaneous Electrical Nerve Stimulator), which is equivalent to medicine, and see its characteristics by reading the corresponding file contained in this same package, and purchase it online, taking care to ensure that the "Stimulation Modes" include the option: "Normal or Constant." If this treatment does not cure you, you should see your treating physician.

INTRODUCTION

To date, I have found several causes of the disease on the internet, as well as several cures.

- a. Rheumatoid arthritis (RA) is a chronic autoimmune disease that causes inflammation and pain in the joints, especially in the hands, feet, and wrists. It affects the lining of the joints and can damage bone tissue and cartilage over time. In addition to the joints, the inflammation can spread to other organs and cause symptoms such as fatigue, weight loss, and problems with the skin, eyes, heart, lungs, and nerves.
- b. Urates are uric acid salts that cause gout. Osteophytes, or calcified salts, are the cause of the remaining 92% of joint and spinal diseases. These include all types of arthritis and osteoarthritis, osteochondrosis, osteoporosis, rheumatism, bursitis, and even hygroma. All of these diseases have one cause: osteophyte deposition.
- c. THYMUS. A possible cause of this disease could be the THYMUS: It may be related to autoimmune diseases such as myasthenia gravis, lupus, or rheumatoid arthritis.
- d. Etc.

Following the simple logic that the formation of a substance or layer between the joints could be generated by an organ that produces a large amount of substances, the liver, with more than 500 functions, would be the likely culprit responsible for this disease. Design this simple treatment with the confidence that the worst thing that could happen when treating a new disease is that it does not cure it, without causing any side effects.

TREATMENT OF RHEUMATOID ARTHRITIS.

1. THE LIVER AS THE PROBABLE CAUSE.

Figure 1. Pad positions for liver treatment.

TREATMENT:

TIME: 10 minutes per position

CURRENT INTENSITY: Increase the current intensity until you feel it and then reduce it slightly until you no longer feel it.

ELECTRICAL STIMULATION

The treatment consists of stimulating the liver (across it) as shown in Figure 1, applying the times indicated above.

1. THE THYMUS AS A PROBABLE CAUSE:

"The thymus is an organ of the immune system located in the upper chest, behind the sternum, which produces white blood cells (lymphocytes) to fight infections and which atrophies with age. It also has an endocrine function, as it produces hormones and is associated with various diseases, including tumors and immune system problems such as myasthenia gravis."

Figure. Position of the THYMUS in the body.

TREATMENT TIME: 10 minutes per position

CURRENT INTENSITY: Increase the current intensity until you feel it and then reduce it slightly until you no longer feel it.
